PROFILE

Final-year Bachelor's student at Saint Petersburg Polytechnic University, majoring in *Mathematical Support and Administration of Information Systems*.

Passionate about building reliable and scalable backend systems, analyzing complex datasets, and creating user-friendly solutions. Focused on security, code quality, and continuous improvement, with a strong interest in applying modern technologies to real-world problems.

KEY SKILLS

- **Languages:** Python (FastAPI, Flask), Go, Java, SQL
- **Frameworks & Tools:** Docker, Kafka, Nginx, REST API, Git, Swagger UI, OpenAPI
- **Databases:** PostgreSQL, MySQL, Redis
- **Data Analysis:** Pandas, NumPy, Matplotlib

ACTIVITIES AND INTERESTS

- Chess
- Computer games
- Football
- Travel
- History

WORK EXPERIENCE

Backend developer (TE-Manager)

01.2024 – Present

- Led backend development: designed the architecture and implemented the core system.
- Built automated testing and security systems.
- Successfully grew the product from a small startup into first commercial sales.

Data analyst (Team Avulus)

09.2024 – Present

- Supported Avulus Dota 2 roster in preparation for matches, contributing to victories.
- Collected and analyzed data from multiple sources (Spectral.gg, DotaBuff, OpenDota, Stratz).
- Applied Python with core DA/DS libraries (Pandas, NumPy, Matplotlib, etc.).

EDUCATION

Bachelor of Science in Computer Science

Saint Petersburg Polytechnic University

06.2026
