PROFILE

Go backend developer with 3 years of experience building APIs and microservices and working with databases. Experienced in cross-functional collaboration and leading a small team.

EXPERIENCE

TE-Manager

Sep 2023 - Present

Backend Developer · Remote

Task and emotion management app

- Implemented microservice architecture using Go and FastAPI, migrated monolithic Flask API into independent microservices.
Developed and maintained more than 5 microservices.
- Implemented subscription service and integrated YooKassa API for payment processing.
- Implemented JWT authentication, token revocation with Redis, and OAuth2 sign-in with Google and Yandex.
- Added Redis-backed rate limiting and verification code caching.
- Set up infrastructure in Yandex Cloud with PostgreSQL, Nginx, and TLS; integrated S3-compatible Object Storage; configured Docker Compose and documented the API with OpenAPI.

The project team won a RUB 1 million grant in the Student Startup competition, round V, 2024.

Team Avulus

Oct 2024 - Apr 2026

Backend Developer & Data Analyst · Remote

Professional Dota 2 esports team

- Developed and deployed a Go service that collects data from OpenDota, STRATZ, and Spectral.gg and generates statistical reports for the coaching staff.
- Automated opponent data collection and processing using Python, Pandas, NumPy, and MySQL.
Match preparation time decreased from ~4 hours to ~30 minutes.
- Automated analytics reports and visualizations to support match preparation.
- Wrote complex SQL queries for analyzing match and player data, and created visualizations in Datawrapper.

During my tenure, the team earned over \$300,000 in prize money, secured 1st place at RES Regional Champions, 4th place at CCT Series 5, 5–6th place at ESL One Bangkok 2024, and won three qualifiers.

TECHNICAL SKILLS

Programming languages: Go, Python

Databases: PostgreSQL, MySQL, ClickHouse, MongoDB, Redis

Messaging: Kafka, RabbitMQ

APIs & protocols: REST, gRPC, HTTP, TCP

Testing: Unit Testing, Integration Testing, Testify

Monitoring: Prometheus, Grafana

Tools & infrastructure: Docker, Linux, CI/CD, Git, DataWrapper, OpenAPI, Yandex Cloud

English — B2

EDUCATION

Ural Federal University

Master's program · 2026 - 2028

Software Engineering

In progress

Peter the Great St. Petersburg Polytechnic University

Bachelor's degree · 2022 - 2026

Mathematical Software and Information Systems Administration
